## Who We Are

**TOMSEY ENGINEERING AND SERVICES INTERNATIONAL LIMITED [TESIL]** is an indigenous Engineering, Management and Technical Services company incorporated in 1992 to provide Engineering, Procurement and Construction services for the Nigerian Oil, Gas, Power, Petrochemicals and Industrial sector.

We are well positioned to provide you quality services in the followings areas:

- **PROCUREMENT**
- **ENGINEERING AND MAINTENANCE SERVICES**
- **CONSTRUCTION**
- **INFORMATION TECHNOLOGY SOLUTIONS**
- **MANPOWER DEVELOPMENT**
- **OCCUPATIONAL SAFETY AND HEALTH MANAGEMENT**

## Our Mission

Our mission in **TOMSEY** could be summarized as follows:

- To provide Quality Engineering, Technical and Management services to meet our customers' requirements while ensuring that they derive maximum benefits from their investment. We will achieve this by adopting international standards in our products and services.
- To contribute to the human resources development of our clients by enhancing their knowledge and skills through training intervention in various aspects of operation and technical development.

## Our Vision

To become one of Africa's leading Engineering, Procurement and Construction company within the next decade providing quality services for our clients and driven by International standards and specifications.

## The Team

The **TOMSEY** multidisciplinary team comprises of Engineers, Administrators and other professional with complementary skills committed and holding themselves accountable for achieving the corporate goals of excellence in service to our clients. The team has developed a distinct identity that enables them to work together in a coordinated and mutually supportive way to fulfill the corporate mission and vision of our organization. We pool experience and expertise together in order work together with excellent team spirit geared towards making our customer the main focus of our activities.

## What We Offer

**TOMSEY** offers excellence and quality service to meet the clients' aspirations and expectations. We have a cream of dedicated Engineers and professional who take pride in excellence in service delivery, customers satisfaction and exceeding customers' expectation every time we are giving the opportunity to serve.

## Our Experience

Our company has served the Oil, Gas, Petrochemicals, Cement, Foods and beverage industry since our inception. Our clients include Cadbury Plc, Shell, Mobil, NNPC, Nigerian Gas Company, Oando PLC, Panocean Oil Corporation, Platform Petroleum, Addax, Kainji HydroElectric Plc, Shiroro Hydroelectric PLC, and a host of others. We have a great record of excellence that has made us a company of choice for all our clients.

## Our Partners And Affiliations

We partner with various International organizations in responding to our clients needs as may be required from time to time. Be it Engineering design, construction, maintenance, procurement or any other area where we identify a skill gap in our competence, we are always keen to utilize the advantage of superior skills provided by these companies based on their years of experience.

***“Let Our Experience Work For You”***

...a commitment to safe and suitable work environment

## ENGINEERING AND MAINTENANCE

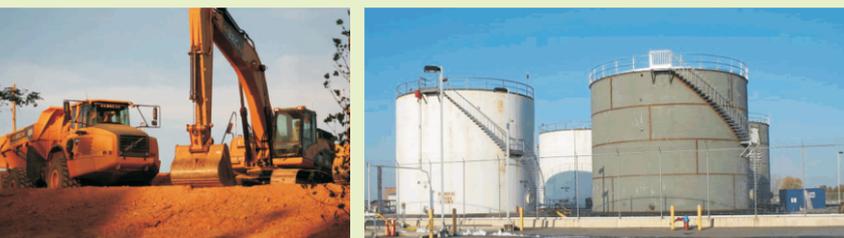

Our Engineers provide the latest and best services in Engineering and Maintenance services to support our clients' growth efforts. We are well positioned to provide you with the procurement, installation and commissioning for your various projects in any part of Nigeria and West Africa at large either as a turnkey project or as you may require.

*We provide Technical Support services in areas of*

- Electrical, Mechanical and Civil maintenance
- Tank cleaning and tank painting
- Maintenance of Rotating and static equipment
- Renovation services
- Certification of cranes and lifting equipment

*We also provide operational support to our clients in*

- Process and operational management
- Operational and maintenance training
- Operational manual development and deployment
- Fire and Gas protection services
- Technical documentation and Technical Editing
- Equipment leasing
- Manpower supply and Technical hiring
- Technical manpower development

## CONSTRUCTION SERVICES

We are well equipped to carry out Civil, Electrical and mechanical construction works in any location within the country. Such works include Building erection, Mechanical equipment installation, Process plant construction, EPC Contracts for Oil and Gas facilities, Renovation services, Highway and road construction, tanks etc.

Competitive tendering, professional management, quality construction, an excellent safety record, a proven ability to meet exacting programs and our co-operative and proactive approach have endeared us to our clients in both the public and private sectors

The majority of our engineers have been involved in landmark projects, from screening and conceptual studies to delivery and they form a strong performance core within the company. Building on the past experience of this team of experts, TOMSEY Engineering is able to deliver and transfer specific technological improvements from one project to the next.

We take pride in our delivery, thus our clients can always be assured that only the most experienced and qualified people are serving them, all the time ensuring timely and quality management of all projects and keeping a good eye on the budget to the delight of our clients.

## PROCUREMENT SERVICES

As a front line Expeditor and Procurement Company we often need to be creative and to perhaps provide alternative solutions to difficult procurement challenges.

We maintain regular, supportive contact with our clients and are always prepared to go the extra mile to ensure complete client satisfaction with the service we provide.

Whether your enquiry is large or small, low or high value, you can rely on **TOMSEY** for the same level of service and attention to detail.

### *Our past procurement service experience covers*

- Groundwork equipment e.g. tractors, excavators
- Power station e.g. Electrical and electronic equipment, Turbine spares, control boards/ electronic cards, hydro generation equipments, Packaged cooling equipment etc.
- Oil and Gas equipment including - gaskets, valves, pumps, actuators, pipelines, compressors, catalysts, heat exchangers, flanges, electric motors, electronic cards special tools etc.
- Collapsible fuel tanks
- Marine equipment and spares
- Fire trucks and Firefighting equipment
- Personal Protective equipment including Safety shoes, clothing and special hazard wears including special chemical equipment
- Welding equipment and various industrial tools
- Surveillance security systems

Naturally, over the years, we have established a good working relationship with many major manufacturers and suppliers from all over the world and we believe that we have the ability to quote for and supply many goods that may prove a challenge for other procurement companies – that perhaps do not have our network of contacts.

## HEALTH, SAFETY AND FIRE SERVICES

**TOMSEY** provides quality services in the areas of Health, Safety and Fire leveraging on the international partnership that have been supportive to us for the past 15 years of HSE service to the Nigerian work community.

### **TOMSEY – A ONE STOP SAFETY SOLUTION**

TOMSEY is a one-stop safety solution provider in all aspects of Health, Safety and Environment service. Our HSE Mission is “To support our clients in achieving best practice through training intervention in various aspects of Health, Safety and Environmental Management and provision of quality PPE and HSE equipment to meet her requirements”

### **TECHNICAL SAFETY AND RISK ASSESSMENT SERVICES**

- ▶ Enterprise Mobility
- ▶ Omnichannel Commerce
- ▶ B2B And B2C Web Portals
- ▶ Enterprise Extranets And Intranets
- ▶ Business Intelligence
- ▶ Customer Relationship Management

### ICT PROJECT DELIVERY

Enjoy more ROI through our full range offer on Project Delivery Services on your ICT Infrastructures. We follow a structured approach to Project Management to ensure success – it's that attention to detail that makes all the difference.

### ICT AUDITS

- ▶ Understand your existing setup
- ▶ Solve performance problems
- ▶ Reduce IT support issues
- ▶ Cyber Security
- ▶ Get the best from your systems

Our Auditing process typically follows three distinct stages:

- ▶ Review meeting
- ▶ Performance of the Audit
- ▶ Presentation of reports and findings

### ICT INFRASTRUCTURE

#### HOW WE CAN HELP YOU

#### TECHNICAL OPERATIONS

We can work on our own or alongside your internal technical team to:

- Assess how latest technology can be used to help improve business operations
- Identify better ways to get things done, find efficiencies, and make your life easier
- Help design and implement new infrastructure
- Manage and implement infrastructure upgrades
- Remote support for infrastructure through event management

#### OPERATIONAL SCENARIOS

We can help to make sure your ICT infrastructure:

- Is aligned with your business goals and supports true ROI
- Is flexible, scalable and future proof
- Is prepared and supported during and after office moves.
- Ensures business continuity and avoids disruption or disaster
- Meets any growth and new business needs you may have
- Is prepared for mergers and acquisitions

We cover all or any of the following areas:

- On-premise and Hybrid infrastructure solutions
- Email systems
- Backup, High Availability, SAN, and continuity solutions
- Networking, including routing, switching, firewalling and VLANs
- Remote monitoring and management solutions
- Cabling – testing, re-cabling, patching, and installations
- Connectivity (including broadband and site-to-site private networks)
- Telephony solutions – including integrated PBX replacements, and mobile phones

### ICT PROCUREMENT

We work in partnership with select hardware and software industry leading manufacturers. We identify, procure and supply your full range of ICT services, solutions and systems around:

- ▶ Computers  
Servers, Virtualization, Backup and storage solutions, Desktop PC's, Macs, Laptops, Notebooks, iPads and Monitors
- ▶ Networking
- ▶ Cloud and Hybrid solutions, Hosting, wired and wireless, switches, routers, UPS, security – Firewall and VPN solutions, leased lines, and broadband
- ▶ Peripherals  
Printer solutions, keyboards, mice, scanners etc.
- ▶ Communication  
Telephone systems, VoIP handsets and accessories, PDA's, Mobile Devices and smart phones

#### Other solutions

- ▶ Operating Systems Software
- ▶ Server Applications – Data Sharing, Email, Virtualisation, Remote Desktop, Network Management and Configuration
- ▶ Accountancy & Office Applications
- ▶ Anti-virus & Security – Network / Desktop
- ▶ Remote Monitoring and Management
- ▶ Data Backup Solutions
- ▶ Email Utilities & Spam protection

### Why Choose US

- ▶ You first – technology second
- ▶ Supporting Productivity
- ▶ Committed to Quality
- ▶ Satisfaction Guaranteed

...a commitment to safe and suitable work environment

# Evacuaid Hazard Kit (The only combined man down system of emergency flashlight and alarm)

## Multiple applications

### Evacuaid can be used as an ordinary man down system

with up to 300 hours of operation. The optional multipurpose bracket allows evacuaid to be attached to the waist belt or shoulder strap and is activated automatically when strapped on the bracket. The instrument has LEDs which light up every 8 seconds to indicate proper functioning.

### Evacuaid can also be strapped on the wrist, for enhanced flexibility.

The user will have both hands free while operating the emergency flashlight, and still be safeguarded by the man down function. When the bracelet is taken off, the bracelet automatically deactivates, ensuring no false alarms.

### Combined man down system and emergency flashlight

The built in emergency flashlight makes evacuaid highly suitable also for emergency situations and evacuation.

### Always at the ready for evacuation

Evacuaid can also be stored together with pure escape equipment like escape hoods by challenging escape routes in fire Marshall kit or worn on belt.

## SPECIAL HAZARD EQUIPMENT & WORKWEAR

### GTB REUSABLE GAS TIGHT SUIT VITON LAMINATE AND OTHER SPECIAL PROTECTIVE WEARS FROM TOXIC & CHEMICAL HAZARDS

Water Companies	Shipping	Nuclear	Health Authorities	Petrochemical	Fire Brigades	Civil Resilience	Pharmaceutical
-----------------	----------	---------	--------------------	---------------	---------------	------------------	----------------

RESPIREX are the world leading supplier of personal protective solutions, specializing in the design and manufacture of high-performance chemical, particulate and respiratory protective clothing and specialist protective footwear.

The product range encompasses gas tight suits, chemical splash suits and emergency responders; air fed chemically protective suits and chemical work wear for the petrochemical and pharmaceutical industries and powered air and air fed particulate suits and hoods for nuclear and pharmaceutical industries. The state of the art automated footwear factory produces a range of protective boots and overboots providing protective from hazardous chemicals and high voltages, along with specialist food industry boots and general safety boots.

RESPIREX is unique in offering a complete service that includes standard or tailored equipment solutions combined with unrivalled training, aftercare and support. The in-house testing laboratory is UKAS accredited for chemical permeation testing to EN 374-3, EN ISO 6529 and ASTM 739, and continually tests the fabrics and seams used in our clothing to ensure our equipment's performance.
